Les situations de dessalage (retournement et abandon de l'embarcation) sur la rivière sont fréquentes. La récupération du matériel et le retour à la berge nécessitent d'accepter les risques de contusions. Nos activités d'eau vive sur le parcours aménagé sont organisées de manière à réduire les risques inhérents à leur pratique. Avant toutes activités nous vous conseillons de ne pas juger de vos forces et de vous informer sur leurs risques spécifiques.
